This document serves as an example submission. It illustrates the format we expect authors to follow when submitting a paper to ECCV. At the same time	
it gives details on various aspects of paper submission, including preservation o	
anonymity and how to deal with dual submissions, so we advise authors to read	
this document carefully.	C

#### ECCV-18 submission ID \*\*\*

#### Paper ID 2.3

It is imperative that the paper ID is mentioned on each page of the manuscript. The paper ID is a number automatically assigned to your submission when registering your paper submission on CMT.

#### 2.4Line numbering

All lines should be numbered, as in this example document. This makes reviewing more efficient, because reviewers can refer to a line on a page. If you are preparing a document using a non-IATEX document preparation system, please arrange for an equivalent line numbering.

#### Mathematics 2.5

Please number all of your sections and displayed equations. Again, this makes reviewing more efficient, because reviewers can refer to a line on a page. Also, it is important for readers to be able to refer to any particular equation. Just because you didn't refer to it in the text doesn't mean some future reader might not need to refer to it. It is cumbersome to have to use circumlocations like "the equation second from the top of page 3 column 1". (Note that the line numbering will not be present in the final copy, so is not an alternative to equation numbers). Some authors might benefit from reading Mermin's description of how to write mathematics: www.pamitc.org/documents/mermin.pdf. 

### Blind review

Many authors misunderstand the concept of anonymizing for blind review. Blind review does not mean that one must remove citations to one's own work. In fact it is often impossible to review a paper unless the previous citations are known and available. 

Blind review means that you do not use the words "my" or "our" when citing previous work. That is all. (But see below for technical reports). 

Saying "this builds on the work of Lucy Smith [1]" does not say that you are Lucy Smith, it says that you are building on her work. If you are Smith and Jones, do not say "as we show in [7]", say "as Smith and Jones show in [7]" and at the end of the paper, include reference 7 as you would any other cited work. An example of a bad paper: 

An analysis of the frobnicatable foo filter. In this paper we present a performance analysis of our previous paper [1], and show it to be inferior to all previously known methods. Why the previous paper was accepted without this analysis is beyond me. [1] Removed for blind review An example of an excellent paper:

## 

090	An analysis of the frobnicatable foo filter.
091	In this paper we present a performance analysis of the paper of Smith
092	[1], and show it to be inferior to all previously known methods. Why the
093	previous paper was accepted without this analysis is beyond me.
094	[1] Smith, L. and Jones, C. "The frobnicatable foo filter, a fundamental
095	contribution to human knowledge". Nature $381(12)$ , 1-213.
096	

<sup>097</sup> If you are making a submission to another conference at the same time, <sup>098</sup> which covers similar or overlapping material, you may need to refer to that <sup>099</sup> submission in order to explain the differences, just as you would if you had <sup>100</sup> previously published related work. In such cases, include the anonymized parallel <sup>101</sup> submission [1] as additional material and cite it as

1. Authors. "The frobnicatable foo filter", BMVC 2014 Submission ID 324, Supplied as additional material bmvc14.pdf.

Finally, you may feel you need to tell the reader that more details can be found elsewhere, and refer them to a technical report. For conference submissions, the paper must stand on its own, and not *require* the reviewer to go to a techreport for further details. Thus, you may say in the body of the paper "further details may be found in [2]". Then submit the techreport as additional material. Again, you may not assume the reviewers will read this material.

Sometimes your paper is about a problem which you tested using a tool which is widely known to be restricted to a single institution. For example, let's say it's 1969, you have solved a key problem on the Apollo lander, and you believe that the ECCV audience would like to hear about your solution. The work is a development of your celebrated 1968 paper entitled "Zero-g frobnication: How being the only people in the world with access to the Apollo lander source code makes us a wow at parties", by Zeus. 

You can handle this paper like any other. Don't write "We show how to improve our previous work [Anonymous, 1968]. This time we tested the algorithm on a lunar lander [name of lander removed for blind review]". That would be silly, and would immediately identify the authors. Instead write the following:

We describe a system for zero-g frobnication. This system is new because it handles the following cases: A, B. Previous systems [Zeus et al. 1968] didn't handle case B properly. Ours handles it by including a foo term in the bar integral.

The proposed system was integrated with the Apollo lunar lander, and went all the way to the moon, don't you know. It displayed the following behaviours which show how well we solved cases A and B: ...

As you can see, the above text follows standard scientific convention, reads bet ter than the first version, and does not explicitly name you as the authors. A
 reviewer might think it likely that the new paper was written by Zeus, but can not make any decision based on that guess. He or she would have to be sure that

naa

no c	other authors could have been contracted to solve problem B.	135
		136
	For sake of anonymity, it's recommended to omit acknowledgements in your	137
revi	ew copy. They can be added later when you prepare the final copy.	138
		139
4	Manuarint Drananation	140
4	Manuscript Preparation	141
<b>T</b> 1 ·		142
	s is an edited version of Springer LNCS instructions adapted for ECCV	143
	8 first paper submission. You are strongly encouraged to use $LATEX2_{\varepsilon}$ for the	144
	paration of your camera-ready manuscript together with the corresponding	145
	inger class file llncs.cls.	146
	We would like to stress that the class/style files and the template should not	147
	nanipulated and that the guidelines regarding font sizes and format should	148
	adhered to. This is to ensure that the end product is as homogeneous as	149
pos	sible.	150
		151
4.1	Printing Area	152
		153
Гhe	e printing area is 122 mm $\times$ 193 mm. The text should be justified to occupy	154
the	full line width, so that the right margin is not ragged, with words hyphenated	155
as a	appropriate. Please fill pages so that the length of the text is no less than	156
180	mm.	157
		158
4.2	Layout, Typeface, Font Sizes, and Numbering	159
		160
	10-point type for the name(s) of the author(s) and 9-point type for the	161
	ress(es) and the abstract. For the main text, please use 10-point type and	162
	ele-line spacing. We recommend using Computer Modern Roman (CM) fonts,	163
	nes, or one of the similar typefaces widely used in photo-typesetting. (In these	164
~ ~	efaces the letters have serifs, i.e., short endstrokes at the head and the foot	165
	etters.) Italic type may be used to emphasize words in running text. Bold	166
	e and underlining should be avoided. With these sizes, the interline distance	167
shou	uld be set so that some 45 lines occur on a full-text page.	168
		169
He	adings. Headings should be capitalized (i.e., nouns, verbs, and all other	170
	ds except articles, prepositions, and conjunctions should be set with an initial	171
	ital) and should, with the exception of the title, be aligned to the left. Words	172
-	ed by a hyphen are subject to a special rule. If the first word can stand alone,	173
	second word should be capitalized. The font sizes are given in Table 1.	174
	Here are some examples of headings: "Criteria to Disprove Context-Freeness	175
	collage Languages", "On Correcting the Intrusion of Tracing Non-deterministic	176
		177
of C	grams by Software", "A User-Friendly and Extendable Data Distribution	111
of C Pro	grams by Software", "A User-Friendly and Extendable Data Distribution tem", "Multi-flip Networks: Parallelizing GenSAT", "Self-determinations of	178

	Heading level	Example	Font size and style
-	Title (centered)	Lecture Notes	• 14 point, bold
	1st-level heading	1 Introduction	12 point, bold
	2nd-level heading	2.1 Printing Area	10 point, bold
	3rd-level heading	Headings. Text follows	10 point, bold
_	4th-level heading	Remark. Text follows	10 point, italic
propos	itions, and theore	ns, and Theorems. The numbers etc. should appear in cons	secutive order, starting with
the nu	mber 1, and not,	for example, with the numb	er 11.
4.3	Figures and Ph	otographs	
	-		
		ures electronically and integr	
	_	mmend using package graph	nicx or the style files psfig
or eps			
		drawings, lines are not inte	
		s within the figures must be	
		op of the other. Line drawin	
		erably 1200 dpi). For digital	- *
	0	in figures should have a heig	
-		l up or down accordingly. Ple	ease do not use any absolute
coordi	nates in figures.		
Fig	ures should be nu	umbered and should have a c	aption which should always
be pos	itioned <i>under</i> the	figures, in contrast to the ca	aption belonging to a table
which	should always ap	pear <i>above</i> the table. Please	center the captions between
4.1	rgins and set ther	n in 9-point type (Fig. 1 show	s an example). The distance
tne ma	inginio and bet thei		1 /

. .

Displayed equations or formulas are centered and set on a separate line (with an extra line or halfline space above and below). Displayed expressions should be numbered for reference. The numbers should be consecutive within the contri-

bution, with numbers enclosed in parentheses and set on the right margin. For

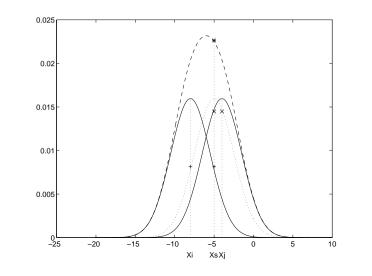

LATEX users, please avoid using the location parameter "h" for "here". If you

have to insert a pagebreak before a figure, please ensure that the previous page

4.4

is completely filled.

**Formulas** 

**Fig. 1.** One kernel at  $x_s$  (dotted kernel) or two kernels at  $x_i$  and  $x_i$  (left and right) lead to the same summed estimate at  $x_s$ . This shows a figure consisting of different types of lines. Elements of the figure described in the caption should be set in italics. in parentheses, as shown in this sample caption. The last sentence of a figure caption should generally end without a full stop 

example,

$$\psi(u) = \int_0^T \left[ \frac{1}{2} \left( \Lambda_0^{-1} u, u \right) + N^*(-u) \right] dt \tag{1}$$

$$= 0? \tag{2}$$

Please punctuate a displayed equation in the same way as ordinary text but with a small space before the end punctuation.

#### 4.5Footnotes

The superscript numeral used to refer to a footnote appears in the text either directly after the word to be discussed or, in relation to a phrase or a sentence, following the punctuation sign (comma, semicolon, or full stop). Footnotes should appear at the bottom of the normal text area, with a line of about 2 cm in TFX and about 5 cm in Word set immediately above them.<sup>1</sup> 

4.6 Program Code

Program listings or program commands in the text are normally set in typewriter font, e.g., CMTT10 or Courier. 

<sup>1</sup> The footnote numeral is set flush left and the text follows with the usual word spacing. Second and subsequent lines are indented. Footnotes should end with a full stop.

# 4.7 Citations

The list of references is headed "References" and is not assigned a number in the decimal system of headings. The list should be set in small print and placed at the end of your contribution, in front of the appendix, if one exists. Please do not insert a pagebreak before the list of references if the page is not completely filled. An example is given at the end of this information sheet. For citations in the text please use square brackets and consecutive numbers: [3], [4], [5] ...

### 5 Conclusions

The paper ends with a conclusion.

627	Now we have reached the maximum size of the ECCV 2018 submission (ex-	627
628	cluding references). References should start immediately after the main text, but	628
629	can continue on p.15 if needed.	629
